Career Objective

Utilize my knowledge of web development technologies and programming languages to create innovative and visually appealing web applications. Eager to learn and grow within the industry while contributing to the success of your company. Excited to work with a team of experienced developers and to contribute to projects. My goal is to continually improve my skills and knowledge in web development and to become a valuable asset to your company.

Skills

Languages: English, Russian
Programming Languages: JavaScript, Typescript, Python, SQL, CSS, HTML
Frameworks / Libraries: React / Redux, Express, Flask
Technologies: SQLAlchemy, Sequelize, Node.js, Git, AWS s3

Projects

Teddir *(JavaScript, Python, React/Redux, Flask, SQLAlchemy, CSS) - Clone of Reddit.com, 4 full CRUD features*
- Implemented AWS s3 into the application, improving user experience and allowing for cloud image hosting
- Created a custom search feature and a multifaceted subreddit customization page with 4 customization options

theGramme *(JavaScript, Python, React/Redux, Flask, SQLAlchemy, CSS) - Clone of Instagram, 5 Full CRUD features*
- Collaborated with a team of 4 software engineers in a Scrum environment, creating the application within 1 month
- Spearheaded initiative to merge pull requests on GitHub, resulting in approval of over 50% of total pull requests and resolving the most merge conflicts on the team

Airbnb Clone *(JavaScript, React/Redux, Express, Sequelize, CSS) - C*lone of Airbnb.com, 3 full CRUD Features
- Integrated third-party API, displaying room location on a map, enhancing the UI and UX of room and booking pages
- Developed server-side and client-side of the application using JavaScript frameworks and libraries

Additional Projects *(JavaScript / TypeScript, React, HTML, CSS)*
- Boggle, Wordle, Etch-A-Sketch
